

PVC-U DOMESTIC/COMMERCIAL TRUNKING SYSTEMS

Offering the complete solution to surface wiring installations for commercial and domestic applications.

- Suitable for horizontal or vertical mounting in dado, skirting and architrave applications.
- No need for precision measuring or cutting to tight tolerances.
- All moulded fittings have a generous overlap, giving a neat finish.

BENCH TRUNKING

PVC-U Bench Trunking is adaptable, sturdy and easy to install – when fitted with dividing fillets it provides the ideal answer for bringing segregated services to any desk or bench top working environment.

- Compatible with the Sterling range of accessories, including the data modular socket.
- Standard Sterling front plates mean a super-smooth appearance.
- With a Double End Cap back to back configuration is easy.
- Positive fixing lids mean ease of installation and allow cabling to be reconfigured at any time.

Cornice Trunking provides an elegant, unobtrusive concealment for surface wiring around ceilings. The system has been designed for use with MMT1 and MMT2 Mini-Trunking, with adaptors available for cable runs across the ceiling or down the wall.

- Overlapping fittings provide a generous tolerance for cutting inaccuracies thus reducing installation time.
- All fittings are clipped to the cornice after cables have been installed.
- Built in cable retainer. Additional retainers available if required.

ANGLED CABLEWAY SYSTEM

Angled Cableway is a versatile and unobtrusive alternative to square systems and offers numerous applications for the management of power and data. An inexpensive solution within individual offices, science labs, or studios, infact for anywhere you need to run into corners and along desks or benches.

- Suitable for horizontal or vertical mounting.
- Single or twin compartment.
- Single gang accessory box features a four-pillar design for both horizontal and vertical mounting.
- Ideal for use with surround sound music systems.
